

ARK OF CRYPTO WHITEPAPER

MEMECOIN MEETS CHARITY

Ark of Crypto is a community token that has been created to build a large community to establish itself in the market. For this purpose, a charity is founded that donates the donations to a non-profit organization every 3 months, to which it will be the community in the telegram group itself. No coins will remain with the founders but will be left on the market unless they have all been sold in advance for the crew. ARK OF CRYPTO is a memecoin on solana and will be listed with the target on binance. The coin will be available to the community everywhere from the binance listing until then it will be promoted by us to achieve all goals. Marketing is funded by liquidity pool and marketcap. We are a community-oriented meme coin that sets itself apart by providing its crew with a safe passage through the stormy seas of crypto waters, while our stated goal is to gradually move to larger and larger ports of crypto exchanges and dock there through listings. We and our team are working day and night to maintain our ark so that it can grow bigger and bigger and accommodate more and more people. We as the Ark are nothing but the crew that decides to join us on the journey. So be prepared for the crossing of a lifetime. Come on board and start to take the course of the ark and your life into your ownhands!

Part of the ship, part of the crew.

We look forward to seeing you on the Ark of Crypto.

Utility

The Ark of Crypto coin has its utility in that each coin has an added value and is donated to a charitable organization. As well as we have created a pool just for the charity events.

We already have several partners who are involved as soon as we have made a name for ourselves with our coins in the crypto scene.

We have conducted many negotiations and have been promised fixed contractual partnerships.

Our goal is to work with many pet food stores in Germany, Switzerland and Austria so that our AOC coin will be accepted as a means of payment in those stores.

We are doing something good for four-legged friends across Europe for the time being and hope to be able to spread further later on.

A memecoin that has gained a lot of attention during our negotiations, now it is our task to take the first steps and organize a community of at least 500 crew members.

Charity Events

We are the first memecoin with a real usecase that is doing something good for the future through many targeted partners and charities. The charity events will be secured by the crew for which there will be a separate wallet with 2-factor authentication. It will later be supported by animal welfare organizations and other sponsors that we can bring to the Ark as soon as we have 500 members.

The charity pool consists of

15% = 15000000 Token

This will be distributed with a payout of 5% every quarter from a market capitalization of 1 million dollars.

This project is supported by sponsors so that a good amount of donations can be collected.

With the sale of 500 crew seats and a planned presale and the support of various partners, we are confident that we will reach this goal early.

Via our Telegram channel, a vote will take place every 3 months to determine which aid organizations the donations will flow into, and our admin will explain and arrange everything at certain times.

A future-proof project starts with you, with the crew, we will do something good and make history.

Crew

Our crew will consist of 500 members who have secured their place on the Ark for at least 1SOL.

Everyone is welcome to participate in the design of the whitepaper website and in the creation of new partnerships. All ideas and suggestions will be openly discussed and developed.

Many other benefits are planned for the crew, such as

- meetings and events
- merchandising
- working together and growing together
- bonuses that you receive every Sunday
- meetings with our celebrity sponsors

And much more that we will achieve over time.

It's a project that has never been done before, as a community coin we depend on our community to grow, the key is our CREW, our crew members should be aware of being a long term holder to achieve something big, through the rewards you receive you can cash out anytime you win. Rewards will be distributed to crew members 2,500 tokens every Sunday until the crew is complete. After that, the rewards will be delivered on the first Sunday of the month. The pool is distributed 50% to the members, the other 50% as soon as the coin has been listened to.

Let's sail together on the ARK OF CRYPTO across the crypto sea and take off together towards the moon.

Marketing

The 5% marketing pool should be used at the beginning to promote and support the project.

The team will not use the money for any influencers who are not behind the project. We

prefer quality over quantity and hope to have the right partners on our side that we are

aiming for. For marketing it is just as important to be supported by our members, building a

community with a use case without millions of start up capital is a challenge we have made

our mission.

- A non-profit coin with a non-profit team
- To make a big difference.

In the course of building the website, we have entered into important partnerships that have

promised us sponsorship support and want to contribute to our Ark of Crypto project. The

most important point is to participate in charity events and thus establish the Memecoin in

our society for the benefit of charity. Our coin has a charity pool of 15% that starts to

distribute tokens from a market cap of 1 million dollars.

Each coin purchased from this pool will be supported by at least 0.1 cents.

The pool is expected to have a payout of 5% every 3 months.

Through many negotiations with our future sponsors we have reached an agreement:

Step 1

Build a crew and the Ark of Crypto foothold from 500 crew members to at least 1Solana.

Finalize the landing page and start building a strong community.

To enable further partnerships with e.g. influencers who believe in the project and help us to promote the project.

Step 2

Our crew members have the right to decide how we proceed afterwards, again there are two options, we will launch our coin or we will start an official presale.

Our community will manage this by voting via Telegram group.

Step 3

As soon as all 500 crew members have their place, 10% of every token sold from now on will also be placed in the Charity Events Pool. The crew members have their place until they sell their tokens, after that it is no longer possible to act as a member, but the place will still be given to a new member by buying at least 20,000 tokens at the current price and applying for it via email or by another crew member.

It is a responsible role as a member,

- decides where the money is donated every 3 months
- the rewards are paid out to those members
- Decision power for further projects
- Decision making power for merchandising design

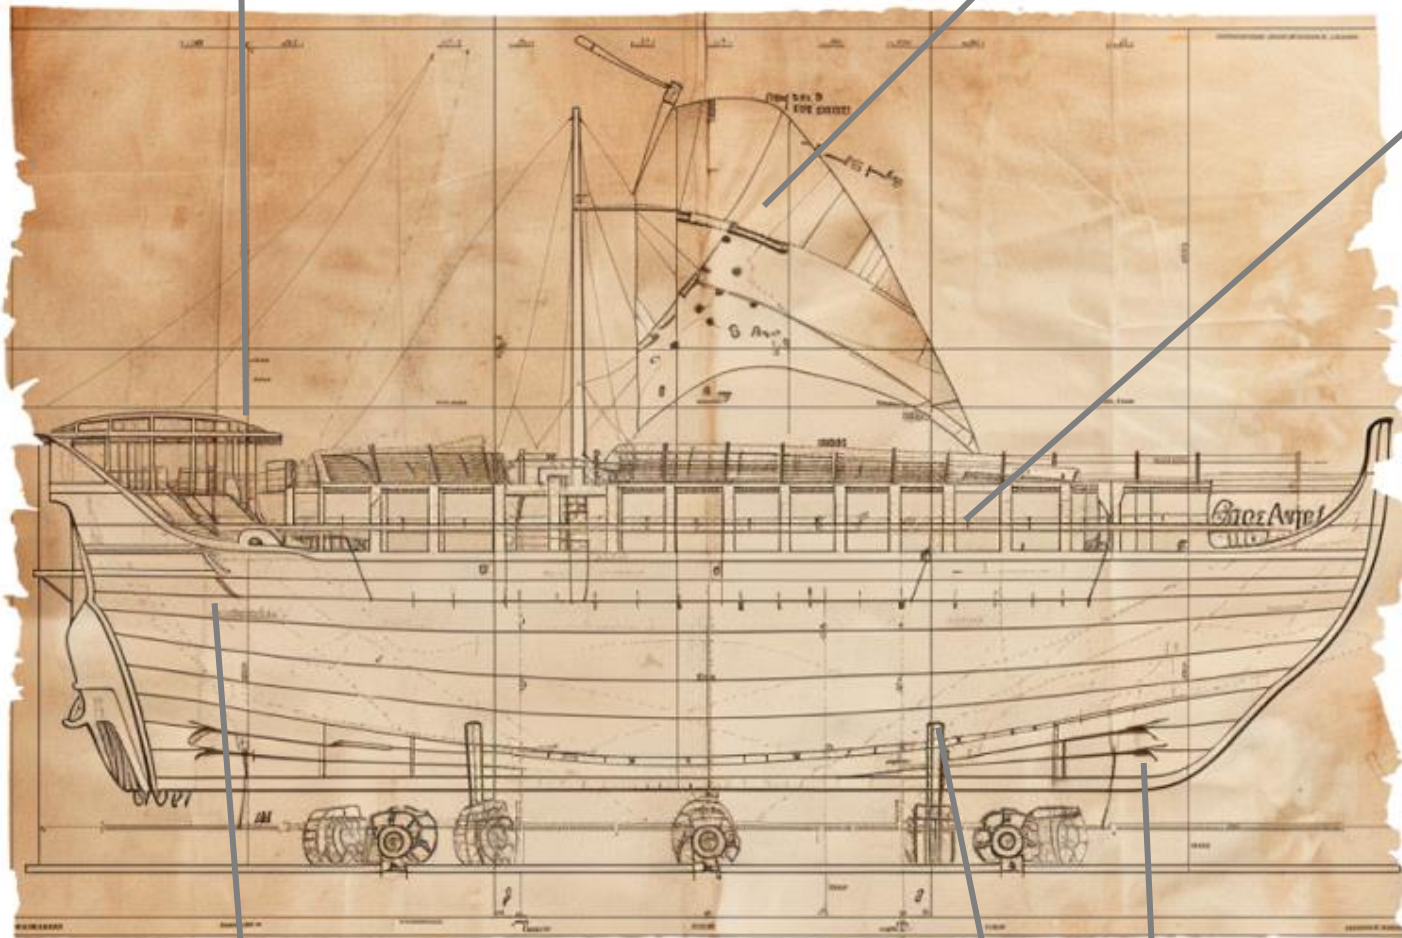

As well as all other ideas and suggestions to further improve and contribute to the project.

Tokenomics

35% Treasury
Tokens: 35.000.000

15% Crew Treasury
Tokens: 15.000.000

5% Marketing
Tokens: 5.000.000

Tokens: 20.000.000

15% Charity Event
Tokens: 15.000.000

10% Crew
Tokens: 10.000.000

Seamap

Important

It is not possible for the founders of this token to keep or buy tokens themselves, we are contractually obliged not to enrich ourselves with the tokens at any time. Our wallet will also be monitored by our partners who will fulfill their part of this project according to the set timelines and contractual requirements. In addition to this whitepaper, there will also be a seapaper that will continue to record our further activities and projects that run via ARK OF CRYPTO.
